Subject: New Bedford Harbor Hot Spot Cleanup - DACW45-92-C-0101
City of New Bedford - Transportation Ordinance

re: Perland letters 120-363, 120-391
U.S. Army Corps of Engineer letter dated 3 September, 1993
U.S. Environmental Protection Agency letter dated 3 September, 1993

Dear Mr. Beaudoin,

This letter concerns the response of Perland Environmental Technologies, Inc. to the City of New Bedford ordinance regulating the transportation of mechanisms for incineration and water treatment.

Perland will implement a contingency plan for the shipment and storage of water treatment plant equipment. Perland will lease warehouse space outside of New Bedford to accept delivery of and provide for the storage of the water treatment plant equipment.

Perland will apply for any required permits to transport the water treatment equipment to 103 Sawyer Street. Perland will comply with all local, state and federal ordinances, laws and statutes. Costs and additional time associated with storage and additional transport will be subject of a future change order proposal.

Thank you for your attention on this matter. Please call me at 999-6584 if you have any questions.

Sincerely,

Mark C. Pelson
Site Project Manager
